

Brahma Teja Reddy Polu

Yerraguntla, Andhra Pradesh, India | 9110791336 | brahmateja1910@gmail.com | [LinkedIn](#)

Professional Summary

B.Tech graduate specializing in Artificial Intelligence and Machine Learning, with hands-on experience in Python, ML frameworks (Scikit-learn, TensorFlow), FastAPI, and AI-powered application development. Built an end-to-end multi-tenant Retrieval-Augmented Generation (RAG) platform using vector databases and LLM integration for secure, organization-level document question answering. Strong foundation in backend development and analytical problem-solving, with a passion for building scalable AI/ML solutions.

Technical Skills

AI & Automation Tools: Claude, ChatGPT, Codex, Cursor, Groq API, RAG pipelines, LLM integration, Agentic workflows

Languages & Backend: Python, SQL (MySQL), JavaScript, FastAPI, REST APIs, scripting & automation

ML Frameworks: Scikit-learn, TensorFlow, PyTorch (familiar)

Frontend & Web: React.js, Next.js (familiar), HTML5, CSS3, Vercel (familiar)

Data & Dashboards: Pandas, NumPy, Pinecone, Power BI, Matplotlib, Google Sheets (advanced), EDA, data pipelines

Cloud: Azure (familiar), cloud computing fundamentals **Dev**

Tools: Git, GitHub, Jupyter Notebook, VS Code

Projects

SmartDocQA – AI-Powered Document Question Answering System

GitHub: <https://github.com/Teja1910/SmartDocQA>

- Developed a centralized multi-tenant Retrieval-Augmented Generation (RAG) platform enabling multiple organizations to securely manage and query their internal knowledge bases.
- Built scalable backend services using FastAPI for PDF ingestion, intelligent chunking, embedding generation, and enterprise document processing workflows.
- Integrated Pinecone with company-specific indexes and implemented organization-level access control, ensuring users retrieve responses only from their own company's documents.
- Leveraged semantic search and Groq-powered LLMs to generate accurate, context-aware answers while maintaining secure data isolation across organizations.
- Designed and integrated a responsive React.js frontend for secure authentication, document management, and real-time AI-powered question answering.

Experience

Python Full Stack Web Development Trainee – Exafluence Pvt Ltd, Tirupati (Dec 2022 – Jun 2023)

- Worked on Python backend development and SQL database operations.
- Assisted in developing and testing web application modules.
- Gained hands-on experience in backend logic implementation and API workflows.

Data Science Intern Trainee – Pantech Solutions (Dec 2023 – Mar 2024)

- Performed data preprocessing, exploratory data analysis, and visualization using Python libraries including Matplotlib and Seaborn.
- Worked with structured datasets to derive analytical insights and improve data quality.

Data Analytics Virtual Experience – Accenture (Forage) (Jan 2024)

- Analyzed business datasets and derived actionable insights using data analytics workflows.

Education

B.Tech – Computer Science & Engineering (AI & ML)

Chaitanya Bharathi Institute of Technology (Autonomous), Proddatur | CGPA: 8.33 | 2023 – 2026

Diploma – Computer Science Engineering

Government Polytechnic, Pillaripattu | Percentage: 80.09% | 2020 – 2023
